

YouTube API Services — Compliance Evidence

Gala Labs Inc. · Project 197088978210 · ToS Violations Report V.2 (August 17, 2026)
Policy III.F.2a — YouTube logos and icons must follow the Branding Guidelines; icon height must never be smaller than 20 dp.

1. Root cause

The official YouTube icon artwork occupies only **16.91** of the `24x24` `viewBox` (ratio **0.7046**). Our previous remediation sized the *container* to 20–22 px, which rendered a 14–15.5 px *logo*. The report measured the logo itself, so the violation persisted.

Location	Previous container	Rendered logo	Measured in report
Trends guide — list row	22 px	$22 \times 0.7046 = 15.50$ px	15.5 px
Search hub — tab bar	13 px	$13 \times 0.7046 = 9.16$ px	9.1 px

Both figures match the report exactly, confirming the cause.

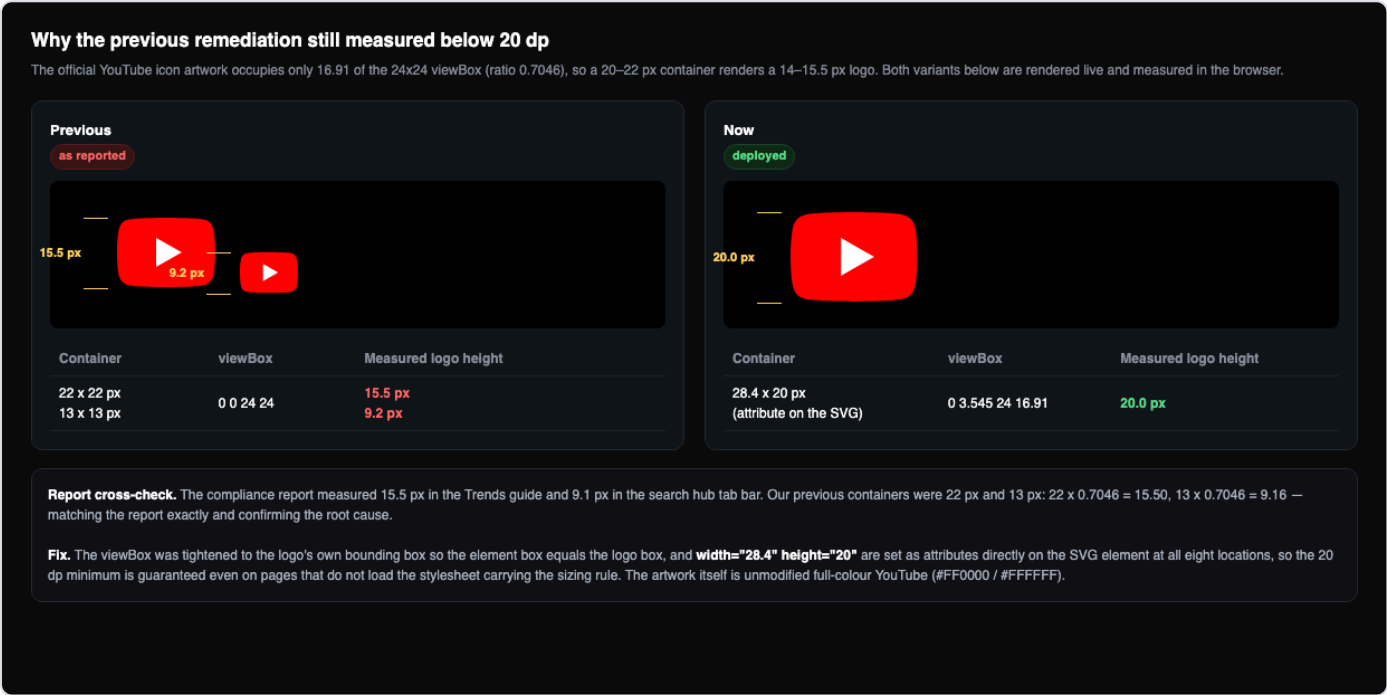

Figure 1 — Previous and current variants rendered live in a browser; heights measured from the SVG path bounding box, not estimated.

2. Fix applied

#	Change
1	<code>viewBox</code> tightened to the logo bounding box <code>0 3.545 24 16.91</code> , so the element box height equals the logo height.
2	<code>width="28.4"</code> <code>height="20"</code> set as attributes directly on the SVG element at all eight locations.
3	Stylesheet rules normalised to height-based sizing.

- Why attributes and not only CSS.** Two components that render the icon are injected on pages that do not load the stylesheet which previously carried the sizing rule. Setting the size on the element removes that dependency, so the 20 dp minimum holds on every page.
- Artwork unchanged.** The icon remains the unmodified full-colour YouTube icon (`#FF0000` / `#FFFFFF`), displayed on a solid high-contrast background, never the most prominent element on the page, and linking to YouTube content within the application.

3. Verification — the two locations cited in the report

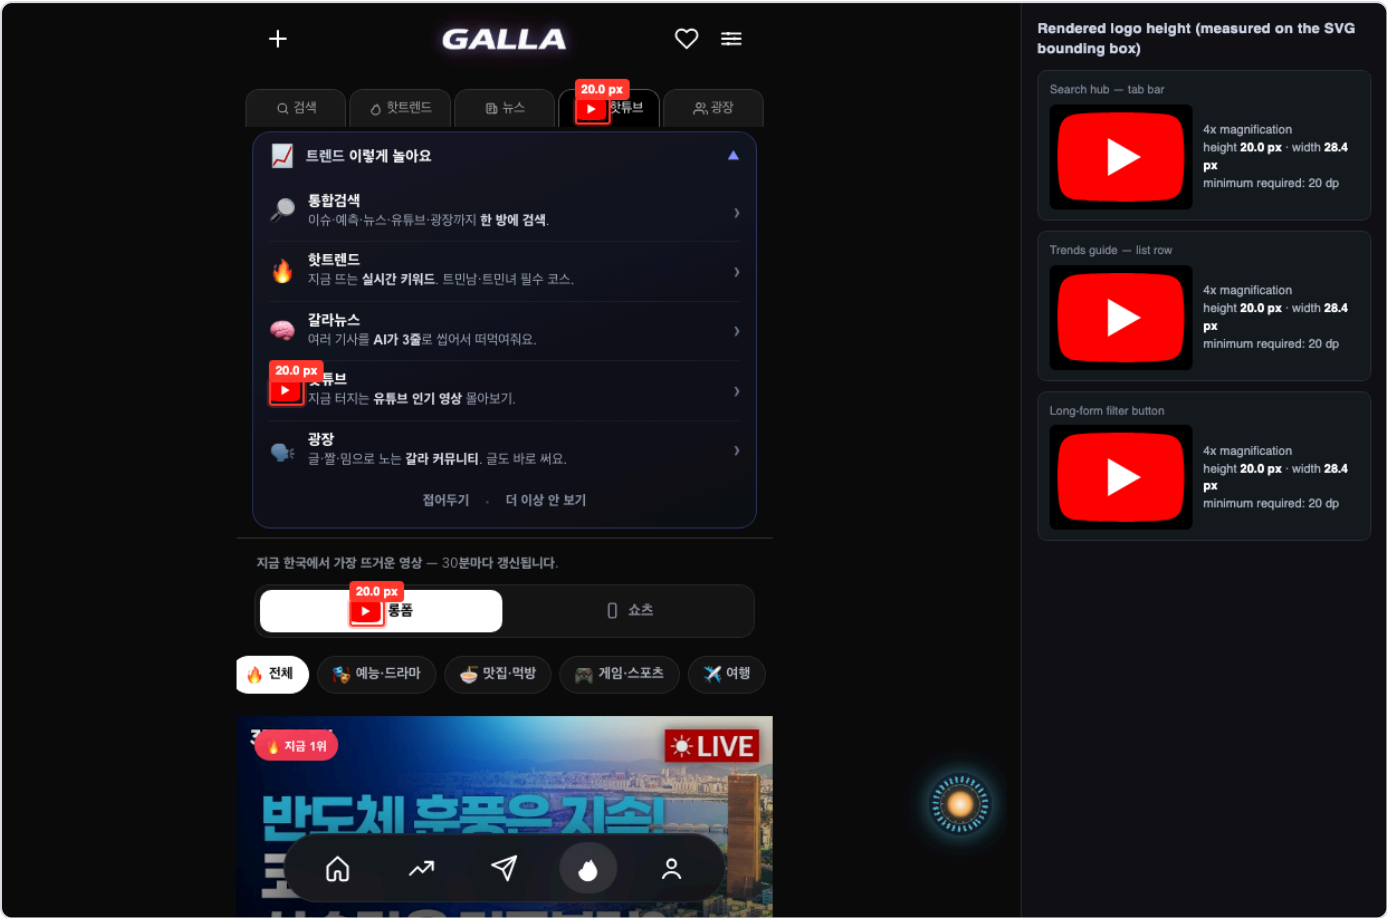

Figure 2 — Live application. Red outlines are drawn from each icon’s measured bounding rectangle; labels show the measured height. Right column shows 4x magnification of the same rendered nodes.

Location	Measured logo height	Requirement	Result
Search hub — tab bar	20.0 px	≥ 20 dp	Pass
Trends guide — list row	20.0 px	≥ 20 dp	Pass
Hot videos — section header	20.0 px	≥ 20 dp	Pass
Long-form filter button	20.0 px	≥ 20 dp	Pass
Page without the stylesheet	20.0 px	≥ 20 dp	Pass
Non-official YouTube marks	none found	—	Pass

4. Deployment

The change is live on <https://galla.im> and shipped to our mobile application. All eight occurrences of the icon in the codebase were updated; a full sweep found no remaining non-official YouTube marks.
